

ABSTRACT OF THE DISCLOSURE

5 A toner for the development of an electrostatic image
is provided wherein at least one layer of a particulate
resin is coated onto a substantial portion of the surface
of an agglomerate of particles made from at least primary
polymer particles and primary colorant particles, wherein
at least one of the primary polymer particles and the
particulate resin contains a wax, and the particulate resin
10 of the outermost layer is substantially free of wax and a
process for producing the toner.
